

Problem-Solution Fit

Date	15 March 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

 1. CUSTOMER SEGMENT(S) [CS] - Students - Working Professionals - Individuals interested in monitoring their well-being - Health & fitness enthusiasts	 6. CUSTOMER LIMITATIONS [CL] - Limited awareness of well-being factors (HDI indicators) - Lack of technical knowledge - Budget constraints - Limited time for tracking - Incomplete or inaccurate health-related data	 5. AVAILABLE SOLUTIONS (PROS & CONS) [AS] Existing Solutions: Generic fitness apps, health calculators, and survey tools. <table border="1"> <tr> <td> Pros - Easy to access - Track basic activities - Provide general health information </td> <td> Cons - Limited personalized prediction - One-dimensional focus - No HDI-based comprehensive score </td> </tr> </table>	Pros - Easy to access - Track basic activities - Provide general health information	Cons - Limited personalized prediction - One-dimensional focus - No HDI-based comprehensive score
Pros - Easy to access - Track basic activities - Provide general health information	Cons - Limited personalized prediction - One-dimensional focus - No HDI-based comprehensive score			
 2. PROBLEMS / PAINS + ITS FREQUENCY [PR] - Difficult to assess overall well-being using multiple HDI indicators - Users are unaware of how lifestyle factors affect their well-being - Existing tools focus on a single aspect (fitness or mental health only) - Manual assessments are time-consuming Frequency: Daily / Weekly	 9. PROBLEM ROOT / CAUSE [RC] - Lack of integrated well-being assessment tools - Poor understanding of the impact of multiple HDI indicators - Manual calculations are slow and error-prone - No single platform that combines lifestyle, health, and socio-economic factors using ML prediction	 7. BEHAVIOR + ITS INTENSITY [BE] - Users search for health or wellness information online frequently - Use fitness or wellness apps occasionally - Ignore regular health assessments - Interested in quick and accurate well-being prediction Intensity: Medium to High		
 3. TRIGGERS TO ACT [TR] - Feeling stressed or unhealthy - Receiving abnormal health reports - Desire to improve lifestyle - Need for personalized well-being insights - Recommendation from doctors or wellness programs	 10. YOUR SOLUTION [SL] An AI-powered web application that predicts an individual's overall well-being score using Machine Learning (Random Forest) based on HDI indicators. - Collects user data across multiple HDI dimensions - Preprocesses and analyzes the data - Predicts a well-being score and category - Provides personalized recommendations to improve well-being - Displays interactive charts and visualizations - Offers an easy-to-use interface accessible on any device	 8. CHANNELS OF BEHAVIOR [CH] ONLINE - Web Application - Mobile Browser - Social Media - Health & Wellness Websites OFFLINE - Hospitals / Clinics - Fitness Centers - Educational Institutions - Community Health Programs		
 4. EMOTIONS BEFORE / AFTER [EM] <table border="1"> <tr> <td> Before - Confused - Worried - Uncertain - Stressed </td> <td> After - Informed - Confident - Motivated - Satisfied </td> </tr> </table>			Before - Confused - Worried - Uncertain - Stressed	After - Informed - Confident - Motivated - Satisfied
Before - Confused - Worried - Uncertain - Stressed	After - Informed - Confident - Motivated - Satisfied
