

No. of Functional Features Included in the Solution

Date	15 March 2024
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Functional Features Overview:

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Registration & Login	Allows users to create an account and securely log in to access the application.	Authentication	Done	High
2	Health & Lifestyle Data Input	Enables users to enter personal, health, and lifestyle information required for prediction.	User Interface	Done	High
3	Data Preprocessing	Cleans, validates, and prepares the dataset before model training and prediction.	Data Processing	Done	High
4	Well-Being Prediction	Uses a Linear Regression model to predict the user's overall well-being score.	Machine Learning Model	Done	High
5	Data Visualization	Displays prediction results using graphs and charts for easy interpretation.	Dashboard	Done	Medium
6	Personalized Recommendations	Suggests lifestyle improvements based on the predicted well-being score.	Recommendation Engine	Done	High
7	Model Saving & Loading	Saves the trained machine learning model and reloads it for future predictions.	Model Management	Done	Medium
8	Flask Web Application	Integrates the frontend, backend, and ML model into a complete web	Web Application	Done	High

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	User Login, Data Input, Data Preprocessing, Well-Being Prediction, Flask Web Application

Additional / Nice-to-Have Features	Data Visualization, Personalized Recommendations, Model Saving
Features Tested & Verified	All 8 implemented features tested successfully with sample user inputs and prediction outputs.

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Registration & Login, Health Data Entry, Well-Being Dashboard
2	Backend / Logic	3	Data Preprocessing, Prediction Logic, Recommendation Generation
3	Database / Storage	2	User Information Storage, Dataset & Trained Model Storage
4	API / Integration	2	Flask Backend Integration, Machine Learning Model Integration
5	Security / Authentication	2	User Login Authentication, Input Validation
