

Project Demo Planning

Date	15 July 2026
Team ID	XXXX
Project Name	A Comprehensive Measure of Well-being
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the project is presented effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, objectives, problem statement, and the importance of well-being measurement.	2	Sanjana
2	Dataset & System Workflow	Explain the dataset used, data preprocessing steps, feature selection, and the overall system workflow.	3	Sanjana
3	Machine Learning Model	Demonstrate the Linear Regression model, training process, evaluation metrics, and how predictions are made.	3	Sanjana
4	Live Web Application Demo	Demonstrate the Flask web application: user input, prediction of well-being score, and visualization of results.	5	Sanjana
5	Technical Implementation	Explain the project architecture, Python libraries used, Flask framework, HTML, CSS, and model integration.	2	Sanjana
6	Conclusion & Future Scope	Summarize the project, discuss limitations, future improvements, and answer questions.	2	Sanjana

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why well-being measurement is important, current challenges, and the objectives of this project.
2	Solution Overview	Present the dataset, preprocessing, technology stack (Python, Flask, Scikit-learn, HTML, CSS, etc.), and Linear Regression model.
3	Live Feature Demonstration	Show the complete workflow: user input → prediction of well-being score → results display (including any graphs/visualizations).
4	Q&A Session	Answer evaluator questions, explain challenges faced, and discuss future enhancements such as advanced ML models, additional features, and deployment.
