Data Flow Diagram

DFD Symbol Legend

Symbol	Name	Description
	External Entity	Represents an external user who interacts with the system by providing <i>health, lifestyle,</i> and personal information and receives the well-being prediction results. (Example: User / Analyst)
	Process	Represents the system processes that transform the input data into useful output. (Examples: Data Collection & Validation, Prediction Model, Result Display & Recommendation)
	Data Store	Represents the storage location where information is saved for later use. (Examples: HDI Dataset Database, Prediction Results Database)
	Data Flow	Represents the movement of data between the user, processes, and data stores. (Examples: Input Values, Validated Data, Prediction Result, HDI Category, Recommendations)
